<p><u>MAINTENANCE, RENOVATIONS AND REPAIRS FOR MINISTRY OF DEFENCE AND VETERANS AFFAIRS BUILDINGS</u></p>			
<p><u>GENERAL NOTES</u></p>			
1	THIS VOLUME MUST BE READ IN CONJUNCTION WITH VOLUME ONE OF THIS BID WITH PARTICULAR REFERENCE TO THE SPECIFICATIONS CONTAINED THEREIN.		
2	ALL PAGES OF THIS VOLUME INCLUDING THE COVER PAGE MUST BE INITIALLED IN BLACK INK.		
3	NO ALTERATIONS AT ALL MAY BE MADE TO THE TEXT, DESCRIPTIONS OR UNIT RATES OR PERCENTAGES STATED HEREIN.		
4	ALL RATES ARE INCLUSIVE OF VALUE ADDED TAX AT THE RATE OF 15%.		
<p>Bill No. 1 GENERAL NOTES</p>			
<p>Initial here.....</p>			

<u>Item No</u>		<u>Unit</u>	<u>Rate</u>
	<u>BILL No 1</u>		
	<u>DEMOLITIONS AND ALTERATIONS</u>		
	<u>NOTES :</u>		
1	All reusable materials from the alterations such as, but not limited to, windows, doors, door frames, locks, general ironmongery, roof sheeting, trusses, purlins, fencing, carpets, light fittings, switches, plugs, distribution boards, and the like remain the property of the Department of Works and are to be carefully removed and to be handed over to the Employer.		
2	Such materials are to be removed and transported to the nearest offices of the Department of Works. The materials delivered to the Department of Works are to be receipted. All other building rubble is to be <u>removed from site to a suitable disposal site to be located by the Contractor.</u>		
	<u>TEMPORARY DUSTPROOF SCREENS AND BARRIERS</u>		
	<u>Supply and erect and remove on completion temporary dustproof screens formed of suitable timber framing covered with plywood sheeting and damp proof membrane</u>		
1	Temporary dustproof screens in closing up of window and door openings and the like	m2	175.07
2	Temporary dustproof screens 2700mm high	m	420.49
	<u>DEMOLITION OF EXISTING BUILDINGS</u>		
	<u>Demolition of existing buildings and structures complete including breaking up and removing foundation brickwork to a minimum of 150mm below ground level</u>		
3	Single storey buildings of timber or prefabricated construction with a floor to ceiling height of not exceeding 3m high (area measured over the external walls, excluding roof overhangs and concrete aprons and stoeps) (concrete stoeps and aprons separately measured)	m2	631.55
4	Single storey buildings with metal roofs on timber or steel trusses with a floor to ceiling height of not exceeding 3m high (area measured over the external walls, excluding roof overhangs and concrete aprons and stoeps) (concrete stoeps and aprons separately measured)	m2	651.66
5	Single storey buildings with concrete roofs with a floor to ceiling height of not exceeding 3m high (area measured over the external walls, excluding roof overhangs and concrete aprons and stoeps) (concrete stoeps and aprons separately measured)	m2	881.45
	Bill No. 2 DEMOLITIONS AND ALTERATIONS

<u>Item No</u>		<u>Unit</u>	<u>Rate</u>
	<u>REMOVAL OF EXISTING WORK</u>		
	<u>NOTE :</u>		
1	Prices for the demolition of brick walls must allow for the demolition and removal of small isolated beams and lintols occuring therein over openings.		
2	The area of brickwork to be demolished excludes the areas of openings in walls.		
3	Prices for the demolition of brick or concrete walls, concrete surface beds, columns, slabs and the like must allow and include for the demolition of plastered or screeded surfaces and other finishes related thereto as NO separate measurement or payment will be made in this regard.		
4	Prices for the demolition of concrete must allow for the cutting up and removal of any steel reinforcement in the concrete.		
5	The Contractor must ensure the stability of adjoining walls and structures during the demolition of any concrete and / or brickwork and must provide and install any necessary propping that may be necessary to ensure such stability and prices must allow herefore.		
	<u>Breaking up or breaking down and removing concrete</u>		
6	Concrete footings, bases and steps	m3	1,113.71
7	Concrete columns, walls, beams, slabs and staircases	m3	1,113.71
8	Concrete surface beds, aprons, pavings, etc approximately 75mm thick	m2	98.98
9	Concrete surface beds, aprons, pavings, etc approximately 100mm thick	m2	123.24
10	Concrete surface beds, aprons, pavings, etc approximately 150mm thick	m2	177.29
	<u>Breaking up or breaking down and removing brickwork or blockwork</u>		
11	Brick piers or columns	m3	929.31
12	Kerb walls	m2	81.21
13	Half brick wall	m2	129.62
14	One brick wall	m2	217.70
15	One and a half brick wall	m2	321.20
	Bill No. 2 DEMOLITIONS AND ALTERATIONS

	<u>SCAFFOLDING</u>		
	NOTE :		
1	The Contractor must provide all necessary scaffolding for any and all work required to single storey buildings and to the insides of buildings irrespective of the height of the building as no additional payment will be made in this regard.		
2	Scaffolding will only be measured and paid for work to the external face of the building where the building or structure is higher than one storey and to the actual height of the scaffolding erected.		
3	The Contractor must ensure the stability of the scaffolding at all times and must provide adequate safety rails, barriers and walkways for the workmen using the scaffolding. No materials may be stored on scaffolding.		
4	The height of the scaffolding stated includes the ground floor level.		
173	Scaffolding to the external face of double storey buildings	m	224.17
174	Scaffolding to the external face of three storey buildings	m	389.92
175	Scaffolding to the external face of four storey buildings	m	604.19
176	Scaffolding to the external face of five storey buildings	m	785.55
177	Scaffolding to the external face of six storey buildings	m	948.27
178	Scaffolding to the external face of seven storey buildings	m	1,151.96
179	Scaffolding to the external face of eight storey buildings	m	1,310.82
180	Scaffolding to the external face of nine storey buildings	m	1,489.85
181	Scaffolding to the external face of ten storey buildings	m	1,759.28

<u>Item No</u>		<u>Unit</u>	<u>Rate</u>
	<u>BILL No 2</u>		
	<u>GENERAL REPAIRS TO EXISTING WORK</u>		
	<u>REPAIRS AND SUNDRIES TO CONCRETE</u>		
182	Break up and remove 100mm concrete surface bed in small isolated patches by neatly cutting joint with an angle grinder, making good damp proof membrane under and re-casting in 20MPa concrete, including finishing off smooth	m2	525.25
183	15MPa Concrete in topping 100mm thick cast in panels to existing concrete floors, including preparation and finishing off smooth with a wood float or steel trowel	m2	381.98
184	20MPa Concrete in topping 100mm thick cast in panels to existing concrete floors, including preparation and finishing off smooth with a wood float or steel trowel	m2	402.44
185	25MPa Concrete in topping 100mm thick cast in panels to existing concrete floors, including preparation and finishing off smooth with a wood float or steel trowel	m2	431.28
	<u>REPAIRS AND SUNDRIES TO BRICKWORK</u>		
186	Neatly cut out and remove damaged or cracked section of <u>half brick wall</u> , clean and prepare and rebuild removed section in 7MPa cement bricks in class II mortar, including cutting toothings and bonding	m2	676.40
187	Neatly cut out and remove damaged or cracked section of <u>one brick wall</u> , clean and prepare and rebuild removed section in 7MPa cement bricks in class II mortar, including cutting toothings and bonding	m2	1,226.99
188	Neatly cut out and remove damaged or cracked section of <u>one and a half brick wall</u> , clean and prepare and rebuild removed section in 7MPa cement bricks in class II mortar, including cutting toothings and bonding	m2	1,676.42
189	Replace missing or damaged single brick including preparation and new mortar	No	56.62
	<u>REPAIRS TO ROOF WATERPROOFING AND EXPANSION JOINTS</u>		
190	Prepare, prime and apply one layer 'ABE Index Unigum MS' or other equal and approved 4mm thick waterproofing membrane to concrete, plastered or screeded surfaces in repairs in isolated areas (removal of old elsewhere measured)	m2	428.19
191	Prepare, prime with bitumen primer and apply one layer 'Derbigum SP' or other equal and approved 4mm thick torched-on fusion waterproofing membrane to concrete, plastered or screeded surfaces in repairs in isolated areas (removal of old elsewhere measured)	m2	431.41
192	Prepare, prime and apply one layer 'Index Fidia P' waterproofing membrane to concrete, plastered or screeded surfaces in repairs in isolated areas (removal of old elsewhere measured)	m2	497.52
	Bill No. 3 GENERAL REPAIRS TO EXISTING WORK		
	Initial here.....		

<u>Item No</u>		<u>Unit</u>	<u>Rate</u>
193	Prepare, prime and apply one layer 3mm 'Index Fidia' and one layer 4.5kg/m ² 'Index Fidia MS' exposed mineral surface waterproofing membrane to concrete, plastered or screeded surfaces in repairs in isolated areas (removal of old elsewhere measured)	m2	604.72
194	One layer "ABE 2-ply Malthoid" slip sheet butt jointed and fixed with copper clout nails at 150mm centres with and including one layer 4mm thick "ABE Argo" applied by torch fusion in repairs in isolated areas	m2	223.63
195	Rake out and remove old polysulphide or mastic pointing and prepare to receive new	m	76.86
<u>REPAIRS AND SUNDRIES TO EXISTING ROOF COVERINGS</u>			
<u>Sealing of existing roofs and flashings</u>			
<u>Note :</u>			
1	Prices must allow for the replacing of existing roofing drive screws and washers or hook bolts as may be necessary.		
2	Holes and roofing screws are to be sealed with Klodek waterproofing membrane. The waterproofing membrane sealing holes and roofing screws is to be a minimum size 75 x 75mm.		
3	Apply one coat primer diluted with 25% water, one full undiluted primer coat, one layer of waterproofing membrane and three finishing coats all as specified and in accordance with the manufacturer's instructions.		
196	Seal all holes and roofing screws, etc in galvanised roof sheeting and leave watertight (measured on flat to affected roof area on slope)	m2	202.79
197	Seal all ridges, hip cappings, valleys, side laps, end laps, side flashings, etc not exceeding 300mm wide or girth (measured on flat)	m	161.14
<u>Replacing of individual roofing sheets in repairs in isolated areas</u>			
<u>Note :</u>			
1	The removal of existing isolated roof sheets is separately measured in Bill No 1 of this Volume.		
2	Prices must allow for lifting up of existing roof sheeting, ridges, etc at ends and sides as may be necessary, for replacing roofing screws along side and end laps with existing sheeting and for leaving completely water tight.		
198	0.5mm Galvanised corrugated iron roof sheeting in single length sheets in repairs in isolated areas	m2	363.79

	<u>EARTHWORKS</u>		
	<u>NOTES:</u>		
1	The nature of the ground is assumed to be loose sandy material, therefore "earth", but possibly interspersed with some "soft rock" or "hard rock".		
2	Descriptions of carting away of excavated material shall be deemed to include loading excavated material onto trucks directly from the excavations or, alternatively, from stock piles situated on the building site. It is the responsibility of the Contractor to locate a suitable dumping site.		
3	No risk of collapse will be measured or paid. It is the responsibility of the Contractor to ensure that the sides of the excavations are supported and that they do not collapse. In the event of the sides of the excavations collapsing, the Contractor must at his own cost remove all loose material and compact the bottoms of the trenches, holes, etc.		
	<u>BULK EXCAVATIONS, FILLING, ETC</u>

<u>Item No</u>		<u>Unit</u>	<u>Rate</u>
	<u>BILL No 12</u>		
	<u>JOINERY WORK</u>		
	<u>NOTE :</u>		
1	Items described as nailed shall be deemed to be fixed with hardened steel nails or shot pins to brickwork or concrete.		
2	Particle board shall comply with the following specifications: a) SABS 1300 Particle board: exterior and flooring type b) SABS 1301 Particle board: interior type		
3	Descriptions of frames shall be deemed to include frames, transoms, mullions, rails, etc. Descriptions of hardwood joinery shall be deemed to include pelleting of screw and bolt holes.		
4	Laminate finish shall be glued under pressure. Edge strips shall be butt jointed at junctions with adjacent similar finish. All particle or other pressed wood boards with a laminate finish must have a brown backing or balancing veneer on unexposed faces.		
5	The following cupboard fittings have been measured as complete units i.e. the components of the units have not been separately measured. The descriptions, therefore, of such units shall be deemed to <u>include</u> all components, assembling, housing, notching, gluing, blocking, planting on and screwing with countersunk screws, edge strips, decorative plastic finishes, glass, ironmongery, metalwork, paint finishes, etc as specified and prices must include herefore.		
6	All cupboard units are to sealed around with an approved silicone sealant at the joints between walls, floors and other finishes and fittings.		
7	Worktops, where specified, are to be of 32mm particle board with Delta 90° postformed front edges with 'Formica' HPL or other equal and approved laminate on one side and balancing veneer on underside.		
8	Doors, drawer fronts and drawer carcassess are to be of 16mm 'Melawood' or other equal and approved faced both sides with 3mm thick rigid 'Raukantex' or other equal and approved PVC edge strips all round.		
9	Drawer carcasses are to have 6mm white faced tempered hardboard bottoms.		
	Bill No. 14 JOINERY WORK		
	Initial here.....		

<u>Item No</u>		<u>Unit</u>	<u>Rate</u>
10	Handles are to be 'Union' AL5102-25AS cupboard door knobs 25mm diameter or other equal and approved.		
11	Doors not exceeding 900mm high are to be fitted with two 110° self closing hinges. Doors higher than 900mm are to have three hinges.		
12	Cupboard door locks where specified are to be cupboard cylinder locks. Where lockable cupboard doors are in two leaves, the one leaf is to have a lock as specified and the other leaf is to be fitted with two chromium plated necked cupboard barrel bolts and keeps.		
13	Drawers are to be fitted with suitable proprietary drawer slides.		
14	Sides, divisions, shelves and bottoms, etc are to be of 18mm 'Melawood' or other equal and approved faced both sides with 3mm thick rigid 'Raukantex' or other equal and approved PVC edge strips all round.		
15	Plinths are to be 100mm high with either solid softwood supporting bearers or a proprietary supporting system with adjustable feet. Plinth fronts are to be of two 18mm particle board with 'Deccon' CPL or other equal and approved facing or of 18mm Supawood or other equal and approved painted with and including two coats polyurethane enamel.		
16	Prices must include for all necessary filler pieces, framing, etc.

	<u>PLASTERING</u>		
	<u>NOTE :</u>		
1	Rates must include for preparing brick or concrete surfaces to receive plaster or screeds. Concrete and brick surfaces to receive plaster must be properly wire brushed to remove all loose and flaking material. Vertical concrete surfaces and soffits must also be slushed with a cement mortar slurry before any plastering commences.		
2	Plaster and screeds must be kept damp at all times to ensure that they cure properly and to avoid shrinkage cracks.		
3	No plasterwork must be done in excessively hot or windy conditions.		
	<u>SCREEDS</u>

	<u>Septic tanks</u>		
	Note :		
1	Septic tanks are to be constructed of one brick walls of 7MPa bricks all round. Brickwork internally is to be rendered smooth in 15mm 3:1 cement plaster.		
2	All concrete is to be 30MPa. The base slab is to be 150mm thick projecting 100mm all round from the external wall face. The top slab is to be 150mm thick. The base slab is to be reinforced with one layer of mesh No 393 and the top slab is to be suitably reinforced with Y10 bars at 150mm centres in both directions to the approval of the Department of Works.		
3	Cast iron manhole steps are to be built into the brick walls at 300mm centres at the manhole cover. Access manholes on top of the septic tank are to be constructed of one brick walls plastered smooth internally with a mass concrete concrete surround for and including 900 x 600mm cast iron manhole cover and frame type 9E built into brickwork.		
4	The incoming pipe is to be 110mm uPVC and the outgoing pipe is to be 110mm uPVC. The incoming and outgoing pipework is to be built through the brick walls and is to include a junction and short length of pipe vertically at both points.		
5	Prices are to include all excavations, risk of collapse and spreading and levelling all excavated material not used for backfilling.		
2019	Excavate for and build septic tank size 1760 x 1560mm internally and 2220mm deep to invert with internal one brick division wall with five 110mm uPVC pipes 300mm long built through wall, five 110mm uPVC plain junctions each with a 450mm length of 110mm uPVC pipe and two 600 x 900mm access manholes in top slab	No	55,847.91
2020	Excavate for and build septic tank size 3110 x 1960mm internally and 2220mm deep to invert with internal one brick division wall with five 110mm uPVC pipes 300mm long built through wall, five 110mm uPVC plain junctions each with a 450mm length of 110mm uPVC pipe and two 600 x 900mm access manholes in top slab	No	78,387.88
2021	Excavate for and build septic tank size 6110 x 2960mm internally and 2220mm deep to invert with internal one brick division wall with five 110mm uPVC pipes 300mm long built through wall, five 110mm uPVC plain junctions each with a 450mm length of 110mm uPVC pipe and two 600 x 900mm access manholes in top slab	No	145,309.54
	<u>French drains</u>		
2022	Excavate and build french drain soakaway 800mm wide and 1900mm deep comprising bottom layer filled with clean river stone filling material (20 - 50mm stone) for a depth of 1m wrapped around with and including 'Bidim' U14 geotextile filter fabric, 110mm diameter slotted uPVC drainage pipe and backfill with coarse sand or soil backfill, including all excavations, backfilling as specified and spreading and levelling surplus excavated materials	m	1,774.80

	<u>PAINTWORK</u>		
	<u>NOTES :</u>		
1	All paints are to be applied in strict accordance with the manufacturer's instructions. Painting is to be done by brush, roller or spraying as may be recommended by the paint manufacturer.		
2	No paint is to be applied during cold weather conditions and all paint must be stored and protected from frost or other cold weather conditions.		
3	Prices must allow for painting in different colours and for cutting to line around fittings, windows, doors, etc.		
4	Cellulose fillers such as 'Polyfilla' and 'Aurora' are NOT acceptable. The stopping of surfaces to be painted is to be done with 'Polycell Mendall 90' or 'Pera Universal Repairing Compound' mixed with 30% marble dust.		
5	Prices for paintwork must include for the protection of other finished work, including masking or covering all finished paintwork, as well as finished joinery, tilings, floor coverings, etc during painting operations.		
6	All door handles, locks and other ironmongery, pelmets, electrical switch and socket outlet cover plates, etc are to be removed before painting and are to be re-fitted after completion of painting. All paint spots, stains, etc are to be cleaned off all floors, walls, glass, doors, frames, fittings, etc after completion of the paintwork.		
7	Prices must include for the preparation and stopping of all surfaces as necessary.
